Introduction to training with Lush-Us UK

Lush-Us Uk are one of the UK's leading providers of Hair Extension Training, we believe this is simply because of our standards and values.

All of our training courses were devised by practising technicians with many years experience along with qualified teachers and trainers of Hair Extensions and Hairdressing. Together we created an intense yet informative practical training day to enable our trainees to be knowledgeable and confident technicians.

Once you have completed your training with us we do not desert you and the support and advice you may require is ongoing. Lush-Us Uk take great pride in our high standard of customer service, and want to support you in gaining a great reputation as a credible Hair Extension Technician and therefore guarantee to be on hand if and when help is needed.

What makes training with Lush Us UK different?

In a profession like ours it is paramount to us that our trainees receive first class, up to date training information in their chosen methods of application, we therefore re-evaluate our training courses every three months. Lush Us Uk have worked very closely alongside Habia to ensure that our training courses and assessments deliver and provide our trainees with all of this and more.

We have now been awarded VTCT centre approval which is a first for any UK Hair Extension Training Provider. This coupled with our Elite Training Team has now seen the opening of our purpose built 'Hair Training Academy' in East Yorkshire. The Academy is styled in such a way that it gives all trainees the feeling of working in an exclusive salon. Perfectly located for ease of access by car or train. The academy provides not only Hair Extension Training but also various Hairdressing NVQ courses and courses tailored to suit all wishing to update, improve or introduce new skills in their industry.

We pride ourselves on being the only Hair Extension Training Provider to supply our trainees (at time of booking) with their own personal logon details to our exclusive 'E-Learning Programme' which enables you

to complete your pre-course tutorials and assessments. This is an amazing new tool which allows every trainee to gain a high level of knowledge to support them on their practical training day.

All of our trainers hold relevant teaching qualifications and have vast experience as hair extension technicians themselves. Our trainers deliver the training courses in a professional but fun and relaxed manner, as we understand how some trainees find further education daunting. You will find our trainers adapt their “teaching methods” to suit your “learning requirements”. In short, we all learn in different ways and our trainers will discuss, demonstrate and teach the course in a method which is more beneficial to each individual rather than from the text in a book! Lush Us Uk have a 100% pass rate and we believe this comes not only from having an outstanding training programme, but trainers who will stay with a trainee until they are fully confident in their ability.

Your dedicated member of the Training Team will continue to provide you with 'Post Training Information' sheets for a period of weeks after completion of your course. These reiterate areas of the training you have already received but it also helps you to retain the information and allows us to elaborate on subjects that are easier to grasp once you have a little practical experience.

Lush Us Uk are one of the only training providers who insist our trainees work with a “live model” on the day of training, ensuring that you will be fitting extensions on a human head to fully understand how to achieve natural looking extensions with outstanding results. It is imperative to us that our trainees understand “where” to fit extensions, how far up the head to go, how far forward to go, how much hair to use, how far away from the models scalp to go etc. All of these things make a head of extensions look natural and feel comfortable when fitted correctly. They could be painful to the client and unsightly when not fitted correctly, using a live model in your training gives a trainee far more knowledge and some already vital experience than using a training head.

The kit you receive when you train with us is second to none, AND included in any price quoted. You will receive all tools required to fit in your chosen methods of application in your training, and a professional kit box so that you are literally ready to start your business.

Our Manual has allocated spaces for trainees to write their own notes throughout although we feel we have covered every base and it is an excellent tool to keep referring to if need be.

Exclusive Hair Extension E-Learning Tutorials & Assessments

Here at Lush-Us Uk we have a wealth of knowledge that we would love to pass on to our trainees, however, there just isn't enough hours in the training day. Due to this we are so very proud to introduce our 'E-Learning' pre and post training tutorials and assessments.

When you book your training we provide you with a personal login to Lush-Us UK's Click Class. This is an online training programme that you can work through at your own pace. It enables us to provide you with all the necessary theory required to complete your Hair Extension Training. This also enables every trainee to commence the training day with exactly the same level of knowledge as one another.

It benefits trainees greatly by enabling you to utilise your time, with your dedicated member of the Lush-Us UK's Training team, for even more valuable practical training & tuition. After your training day there will be a final online tutorial for you to complete prior to receiving your certification. This is a vital part of your training as it allows our Training Team to assess your understanding of the course and it will highlight any areas where we feel you may (or may not) require some further assistance. This in turn ensures that you are fully informed in every area possible to launch your new and exciting career in the Hair Extension Industry. We are the first Uk Hair Extension Training Provider to offer such an intense and innovative training programme.

HABIA Approved

Habia is the government standards setting body for Hair, Beauty, Nails, Spa therapy, Barbering and African type hair and creates the standards that form the basis of all qualifications as well as industry codes of practise.

Habia raises the profile of it's industries through press and media.

Habia also delivers solutions direct to salons, employers, trainers and learners.

As a not-for-profit organisation everything you spend with HABIA is invested straight back into your industry.

CPD Hours

CPD stands for Continual professional development and it is vital to your success. Courses that offer CPD hours encourage professionals in the industry to regularly further their education. You can obtain a CPD guidance pack from HABIA and our course supplies you with 7.5 hours towards your required 30 hours of CPD.

Please see HABIA website for further details.

Types of Training

Micro Ring/Bond/Link – the pre bonded hair comes in an I-tip or stick tip (looking like a small shoe lace) and is fitted with no glue, using pliers to clamp the ring to the clients hair. Perfect for those clients who do not like the idea of 'glue' in their hair, however, can be visible in very fine hair.

Pre-bonded – the pre bonded hair has a keratin tip in a 'v', 'u', 'nail' or 'flat' shape and is applied to the hair using a heat connector. The bond is then rolled into the clients hair. The bonds are very discreet and the clients suffers from very little shedding from the bonds.

Shrink Tubes/Shrinkies – the pre-bonded hair comes in an I-tip or stick tip again, and is fitted in a similar way to micro rings but using a shrinkable tube. You apply heat to the tube which then shrinks to the hair holding it in place.

Fusion Bonded/Strand by Strand – the hair is cut from a weft or taken from bulk hair and the glue/keratin is applied by the technician using a glue gun or pot and applied to the hair strand by strand. Fusion allows you to be very flexible with the bond sizes, however, your client will experience shedding. We only teach fusion method on its own (unless you have previous extension experience) because it takes the longest to master and it requires a lot of practise.

We always think it is a sensible idea to offer your clients a glue and a non glue method as it will widen your client base. Due to this the majority of our group training sessions are 'Dual Courses' consisting of Prebonded & Micro ring methods.

Live model

Trainees work with live models giving them vital experience for more natural extensions

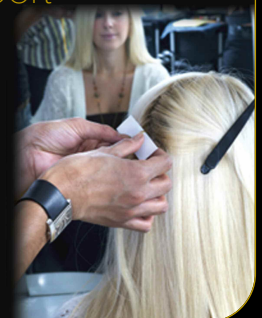

Professional training case

We'll be with you every step of the way

Group Training Information

Our group training sessions are held at various locations throughout the UK on a regular basis (check the website for details of forthcoming dates). Where the group training has more than 4 trainees there will be additional trainers to ensure all trainees receive the maximum tuition required. We find the group training days are successful in many different ways for our trainees as not only do they still receive the high standard of training but it is also an opportunity to meet other trainees and share ideas, observe other live model scenarios and also make a few new contacts for the future!

The training day starts from 9am-4pm (times are approximate), and include your kit, lunch and refreshments.

Trainees are required to bring a live model to the group training days, the model is asked to contribute £75.00 for 16" hair and £90.00 for 18" hair (22" hair can be made available upon request for a further charge) and they will receive a Full Head of Hair Extensions, a Hair Extension Brush, Mini Aftercare Kit and their lunch – somewhat of a bargain!

Group training prices

Micro Ring only	£375+ VAT (£450 inc. vat)
Micro Ring and Pre Bonded	£400+ VAT (£480 inc. vat)
Micro Ring, Pre Bonded and Shrink Tube	£412.50 + VAT (£495 inc. vat)

All trainees will receive a voucher for £50.00 off our Hair Extension cutting course as described below.

One to One Training

We can also provide one to one training in the comfort of your own home or at your salon. The trainee will need to provide a live model for the day who is willing to have a full head of hair extensions fitted. Included in the cost of the training will be the hair for your model and also the cost of your kit and required tools.

It is possible to have more than one trainee in your own venue and the individual price will decrease with each additional trainee. So even if this is a few friends wanting to train together to fit each others hair extensions or a salon with a few stylists wanting to train the price soon becomes even more competitive but please call for further details.

One to one training price	£580+ VAT (£696 inc. vat)
Hair Extension Expert	£662+ VAT (£794.40 inc. vat)

Please note: The Expert's Course includes all 4 methods in one day and is only available to trainees with relevant experience, ie. hairdressers or trainees with previous hair extension experience. This course is not available on group training days.

We also run 'The Art of Creative Placement, Blending, Styling and Shaping' Hair Extension course as cutting Hair Extensions is very different to cutting natural hair. The course is £195 plus VAT but if booked in conjunction with your Hair Extension Course you will receive a further 10% off (this can be applied after your £50.00 voucher has been deducted)

What is included in your kit

	Prebond	Micro ring	Shrink Tubes	Fusion

Weft of Indian Remy Hair				✓

Insurance Information

We would strongly recommend that all practising Hair Extension technicians obtain public liability insurance and another great benefit of training with us is that due to our accreditation our trainees are able to obtain the relevant insurance required. There are numerous insurance companies offering this insurance and we will happily discuss this with you at your training along with additional Business Development.
